Jerry M. Wyatt, *Principal*

Dear Parent/Guardian:

Your son/daughter has satisfactorily completed a state-approved course in Driver Education and should possess the basic skills necessary to operate an automobile. This in no way means that he/she is an expert driver. He/she is still a novice driver, and additional practice with your supervision and guidance is recommended to assist him/her gain needed experience.

It is recommended that you notify your insurance agent that your child is now of driving age, as this is a state law when he/she obtains a Conditional/Special Restricted License. Insurance is more expensive for youthful drivers, however, most companies give discounts to students who have successfully completed a Driver Education course. Enclosed you will find a proof of completion card which must be brought back to the principal's office here at Dorman for his signature. Once his signature is obtained, you may present this to your insurance agent for the appropriate discount.

Listed below is a summary of the instruction that your son/daughter received in the behind-the-wheel phase of Driver Education class, along with an evaluation of their performance in each area. Feel free to use this as a guide as you continue to supervise and guide your child in their driving experience.

Thank you for your cooperation in helping train safe and conscientious drivers!
